## The Secret for the Look of Glow, Revitalized Skin

In the quest for radiant-looking skin, we're constantly on the hunt for the newest cream or silky serum, and trendy treatments don't always deliver the results we hoped for.

If you're looking for a way to keep your skin looking young and healthy, or if you're hoping to reverse some of the signs of aging, try Secret PRO. This clinically proven treatment does double duty by combining two of the most in-demand treatments: RF (radiofrequency) microneedling and a fractionated CO2 laser for maximum effects.

Secret PRO's signature treatment, "The Gentle Peel," resurfaces and reveals younger looking skin on most skin types in just one treatment with little to no downtime. The Gentle Peel addresses the common signs of skin aging such as fine lines, sun damage, large pores, and uneven texture.<sup>1,2,3</sup>

Secret PRO is also ideal for treatments beyond The Gentle Peel. According to Plastic Surgeon Dr. Troy Pittman of Somenek + Pittman MD, "By combining these two powerful technologies, we can use the Secret PRO to stimulate collagen production at multiple layers in the skin for a multi-dimensional approach to skin revitalization."

"This state-of-the-art system is very effective for remodeling the skin to improve tone and texture to deep acne scars or a micro peel treatment to revitalize our patients' skin of the face and the body," he says.<sup>1,2</sup> By pairing the two technologies, Secret PRO can cover all the bases from fractional CO2 skin resurfacing to RF microneedling dermal remodeling."

"The combination treatment allows us to accelerate incision remodeling and scar discoloration for our surgical patients," adds Dr. Pittman.

"With Secret PRO's wide range of treatment options and customizable treatment settings, we can deliver impressive, visible results, leaving patients with noticeably improved skin texture and appearance. By using tiny, ultra-fine needles to create controlled micro-injuries in the skin's surface, we are stimulating the body's natural healing process while promoting the production of collagen and elastin. These two essential proteins are responsible for skin firmness and elasticity," says Dr. Eugene Chen, Medical Director of New Life New Image in Las Vegas.

"Secret PRO's two modalities, RF microneedling and CO2 skin resurfacing, and safety profile across various skin types ensure accessibility and effectiveness for a broad range of patients, making it a standout choice for non-surgical skin rejuvenation. We can tailor the treatment to each patient based on their skin type, skin condition, goals, and tolerance for downtime and accommodate even the busiest schedules," he says.

"Most patients will need a series of treatments to achieve the outcomes they are looking for, from skin revitalization to a more intense treatment plan to reverse the signs of aging. The results we can achieve have been exceptional," says Dr. Chen.
